Are you AWARE?

Delaware Fish & Wildlife Natural Resources Police remind boaters to always check the boat capacity plate, which is usually found near the operator's position or on the vessel's transom. This plate indicates the maximum weight capacity and maximum number of people that the vessel can carry safely. Boaters should always follow the recommended capacity in the owner's manual and on the manufacturer's capacity plate before heading out on Delaware's waterways.

Anglers and hunters should also consider the weight of their extra gear to ensure they do not load their vessels beyond the stated capacity.
